

# The American Chamber of Commerce Launches Exclusive B2B Network for US Businesses

---

FOR IMMEDIATE RELEASE

*This Innovative Platform Offers Comprehensive Digital Tools and Curated Strategic Partners for the Benefit of Well-Vetted American Small Businesses and Startups*

SAN FRANCISCO, CA, UNITED STATES, November 11, 2024 -- This month marks the official launch of the American Chamber of Commerce (ACC), an exclusive business-to-business network designed to empower and support well-vetted small businesses across the United States, its territories, and tribal lands.

Following more than a year of meticulous research and investigation, the ACC has cultivated a suite of strategic partners that comprise our “Business Stack” for Member support. The Chamber aims to become the premier resource for enterprises seeking to establish, grow, and succeed in today's competitive market.

“

**Today, social media for business is plagued by spammers, fake profiles and false flag businesses. We are changing all that with well-vetted members and curated strategic partners in a safe, private network.”**

— Scott Lenhart

The American Chamber of Commerce offers unique services and benefits, including:

- A comprehensive set of digital tools for promoting business content
- Strategies to amplify member businesses' social media content
- Networking opportunities with potential clients, partners and employees
- Saving time and money with curated industry leaders and innovators covering every business need
- Educational features for best business practices
- Marketing, branding, and sales assistance
- Guidance on business formation through to the sale of your company
- A secure platform for local chambers of commerce to collaborate nationwide

"We recognized a critical need for a comprehensive, trusted support system for businesses in America," said Scott Lenhart, Founder and Managing Director of the American Chamber of Commerce.

"By leveraging our extensively researched network of strategic partners, we're able to provide our members with the resources, knowledge, and connections they need for long-term success."

The ACC launches with an impressive roster of partners, carefully selected after more than a year of research.

These partners include recognized industry leaders and innovators across various fields, ensuring comprehensive support for every aspect of business operations.

Our flagship partner, Paychex, Inc., is supporting the rollout of the American Chamber of Commerce Pooled Employer Plan (PEP), offering a cost-effective retirement savings option with reduced administration.

This multiple employer payroll and 401k plan is designed to accommodate even the smallest businesses and independent contractors.

The Chamber helps entrepreneurs launch and grow... *To Found, and Be Found™!*

A key feature of the ACC is the "Echo Chamber," a one-of-a-kind program designed to amplify quality business content across members' social media platforms, fostering engagement and expanding reach within a trusted network.

Trust, and be trusted! The ACC maintains simple, yet strict vetting processes to ensure the integrity of its network, with membership restricted to legitimate businesses based in the United States, U.S. territories, and tribal lands. The closed, private network enforces rules that prohibit spam, fake profiles, political content, and fraudulent activities, including misrepresenting a country of origin.

Early adopters of the Chamber will benefit from numerous advantages, including permanent preferential pricing as a Founding Member. Importantly, the membership fee is applied per business entity, not per employee, offering significant value for organizations of all sizes.

About the American Chamber of Commerce: The Chamber is an exclusive national B2B network (a hybrid between a local chamber and social media) dedicated to supporting and empowering well-vetted U.S. businesses. Through strategic partnerships, comprehensive digital tools, and a secure networking environment, the ACC aims to foster innovation, growth, and success within the American business community.

In honor of Veterans Day and in profound respect for those who serve and have served our nation, we extend exclusive Founding Member pricing to entrepreneurs and business owners that are active-duty military personnel and veterans (and spouses)—our small way of saying thank you for your tremendous sacrifice and dedication to our country.

Membership in the American Chamber of Commerce is now open to qualifying businesses.
